

Environmental Policy

At **Complete Asset Management Solutions (Complete AMS)**, we help businesses with high value, tangible assets execute cost-effective and sustainable maintenance strategies. We are top tier quality maintenance professionals with over 200 years of combined experience.

Complete AMS is committed to continuous improvement of the Environmental Management System to effectively monitor the use of natural resources, both renewable and non-renewable across our operations, and maximise the efficiency and effectiveness with which they are used, with a clear view of minimising environmental impacts.

All documentation and processes are underpinned by **AS/NZS ISO 14001 Environmental Management Systems - requirements with guidance for use**, as well as compliance to relevant local government, state, and federal statutory, legislative, and regulatory requirements.

A culture of environmental awareness and management at **Complete AMS** is achieved by:

- Awareness of the **Complete AMS** Environmental Management System by all workers, including clauses in supply conditions and contracts outlining the requirements for compliance.
- Establish environmental objectives and processes necessary for continuous improvement to enable the measurement of environmental performance.
- Trained workers and appropriate equipment to handle any environmental emergency that could occur on **Complete AMS** premises.
- Liaison with local government authorities to ensure that we meet requirements for the prevention of pollution and effective waste management.
- The provision of adequate resources enables proactive planning and implementation of activities designed to eliminate the incidence of pollution.
- Proactive management of chemical and hazardous substances to eliminate the potential of pollution within areas of control by **Complete AMS**.
- Review of the Environmental Management System, actions and outcomes by Senior Management, and regular monitoring of the system to ensure compliance.
- Communicating environmental information to relevant interested parties.

Kane Watkins
Managing Director
